## Front-End Developer

## Summary

I am a Front-End Web Developer, with project-based experience building JavaScript web applications. I am currently looking for the right opportunity to work and grow my Front-end skills.

Hard-working web developer with a flair for creating elegant solutions in the least amount of time. Developed a Tv-show webapp, Advice Tracker in a social media format, URL shortener. Passionate about Front-end development and hope to progress into Full-stack development and Web 3 technologies.

## Skills

### Technical:

JavaScript, PHP, WordPress, React.js, Next.js, HTML, CSS, Tailwind CSS, Material UI, Figma, Git / GitHub, Firebase

### Non-technical:

Excellent written and verbal communication with designers, users, management and other developers

## Web Development Experience

### Series Purge – [View website](#) | [View code & full README](#)

- Series Purge is a Next.js web application which allows users to search for and request information regarding TV shows. The application makes API calls to TMDB's API and uses firebase (BaaS) for authentication and database storage.

**Key technologies used:** Next.js firebase, Tailwind CSS, TMDB-API, Material-UI

### Mighty URL – [View website](#) | [View code & full README](#)

- Mighty URL is a React.js website built using the Vite.js development environment. Users have the options to choose which domain name to have in the shortened link, either Bit.ly or Rebrandly. That is useful for allowing users get different shortened links without ever leaving my website. The application makes API calls for either Rebrandly or Bit.ly depending on the user's choice and makes use of local-storage to temporarily store the links. Users also have the option to copy the shortened link.

**Key technologies used:** React.js, Vite.js, BIT.ly and Rebrandly – APIs Local-storage TailwindCSS

## Advice Tracker – [View Website](#) | [View code & full README](#)

- Advice Tracker is a basic web application that allows user to post advice base on certain category for people who want advices on the category. It is built using React.js and firebase (Baas) is used for database storage. Users can filter advices based on what the need or read through all the advices.

**Key technologies used:** React.js Firebase, TailwindCSS.

## Other Projects – [View Code](#)

- Zillow's homepage clone using React.js and Tailwind CSS
- Landing Pages (Design)
- Matching game built using vanilla JS
- Restaurant menu web application built using React.js
- Pixel art maker built using vanilla JS
- To-do web app build using vanilla JS.

## Work Experience:

### Side Hustle – React Developer Internship

Oct 2021 – Jan 2022

- Built and developed a bully reporting web application - Spik app - for teenagers that help users of all age group easily interact with the website using React.js and Tailwind CSS
- Committed code to the team's GitHub and created 20+ code reviews
- Converted and implemented 17 design screens from the design team's Figma site using React.js
- Collaborated with designers, project managers, developers and management to decide on ideas.
- Assisted in maintenance of software for the team by solving important bug issues recorded on the teams' task management software.

## Education & Certifications

B.Sc. in Computer Science with concentration in Computer Information Systems (2.1)

Babcock University, 2020

## Interests

- Sports ~ Football (Soccer), Formula 1 (F1), Tennis
- Video games ~ FIFA, GTA
- Walking
- Playing chess
